TO THE WHOLESALE SEEDMEN OF THE UNITED STATES:

Seeds catalogued by us as "grown in Georgia" attain their best development in Georgia, and should be bought afresh here each year. We are prepared to stock the wholesale United States Seedmen with same at lowest prices and best types. State quantity when you write.

TO THE RETAIL SEED MERCHANTS

of Georgia and South Carolina, and elsewhere. If you sell seeds in papers that are sent out on commission, we urge you, for your reputation's sake and your customers' good, that you discard same. These seeds are not burnt that you return, but are sent back and forth for years till sold. The various State experimental stations have many times warned the people against these seeds as being untrue to type and faulty in germination. The different habitats of the various seeds do not allow any seedman in the United States to grow but a small portion of this seed stock. Our seeds are grown for us by careful growers throughout the United States (not Europe), wherever the best development of the individual seed is attained. We are prepared to compete with any United States markets on seeds in papers or in bulk.

WRITE US THE KINDS YOU WANT AND QUANTITY

OUR WARRANTY. We select our stocks with greatest care, and pay liberal prices. We feel justified in saying that all our seeds are the freshest and best to be found, but, at the same time, it must be distinctly understood that we sell no seeds with warranty expressed or implied in any respect, and will not be in any way responsible for the crop. If our seeds are not accepted on these terms, return them at once and we will refund money.

DIRECTIONS FOR ORDERING SEEDS.

RETAIL MAIL ORDERS.--Seed Cash With Order.--Seeds sent only to amount of remittance. We open no accounts. Remit in cash by express, postal order, express money order, registered letter (at your risk), or in postage stamps. No C. O. D. orders sent unless money accompanies order for an amount sufficient to cover express charges both ways. Always state whether to ship your goods by postage or express, and do not forget to enclose the postage or express charges.

CHARGES: POSTAGE (always to be prepaid by us) to any point in the United States is on a 1-lb. package, 10c; 2-lb. package, 18c; 3-lb. package, 25c; 4-lb. package, 35c. By SOUTHERN EXPRESS COMPANY at following rates (we must prepay) to any office of the Southern Express Company, is on 1½-lb. or less package, 10c; 2-lb. package, 14c; 3-lb. package, 18c; 4-lb. package, 26c.

DISTANCE makes no difference by above cheap, easy transportation. We can do your SEED BUSINESS for you if you are 10 miles or 1000 miles away—it's all the same. And we will do your business as carefully for you whether you want ten cents or ten dollars worth of seed. Will be glad to mail free this catalogue to your friends if addresses are sent us.

MAILED FREE OF POSTAGE TO YOU.

GARDEN SEEDS as follows:—1st. All seeds listed in our catalogue as being put up in 2½ papers at following rates: 2 papers for 5c; 12 papers for 25c; 50 papers for \$1.00. 2d. All seeds listed in our catalogue as being put in 5 and 10 cents packets. 3d. All packages seeds up to four ounces quoted in our catalogue as being put in 1, 2, 3 or 4 ounces.

This catalogue is divided into six parts—Garden Vegetables, Economical Plants, Forage Crops, Field Crops, Hog Crops and Grass Seeds.

AUGUSTA, GA.

GARDEN WORK FOR THE VARIOUS MONTHS

—: AND:—

WHEN TO PLANT FOR A PERENNIAL SOUTHERN GARDEN

JANUARY.—Manure and prepare the soil for the more hardy crops. Plant the early crop of English peas, and prepare the ground for Irish potatoes next month. Prune your vines, fruit trees, hedges, etc. Early Wakefield cabbage may be sown; onions and shallots planted; carrots, lettuce and turnips sown; plant early market peas.

FEBRUARY.—Dress asparagus beds; sow artichoke and vegetable oyster late this month; sow tomato, egg plant and pepper under glass in gentle heat; plant early corn; finish pruning, transplanting vines and fruit trees; plant strawberries, horseradish, English peas, onions and Irish potatoes, and yams for slips; sow asparagus, cabbage, cauliflower, celery, carrots, turnips, radishes, parsnips, mustard, spinach, beets, parsnips, onion seed, salsify and cress.

MARCH.—Continue to plant strawberries, English peas, celery, sweet potatoes, onions, horseradish, tomatoes, cabbage and corn; plant ground peas, pumpkins, okra and a few snap beans; protect blossoms of fruit trees from frost with smoke; sow parsnips, radishes, lettuce, carrots, parsley, egg plant, vegetable oyster and onion seed.

APRIL.—Broccoli may be sown, and cauliflower for late crop. Look after your asparagus beds. Many things planted last month may now be replanted, if necessary, to secure good crops, such as cabbage, onions, celery, sweet potatoes, okra, lettuce, onions, etc. Plant watermelons, muskmelons, squashes and cucumbers, in rich, sandy soil.

MAY.—Late this month transplant celery, winter cabbage, tomatoes, sweet potato slips, etc., but they must be well watered and protected from the hot sun. Continue to plant corn and snap beans, pumpkins, winter squashes, table peas and cornfield beans.

JUNE.—Continue to transplant celery, winter cabbage, sweet potato slips, etc., protecting them from the hot sun. Prepare ground for turnips by frequent ploughing and digging. Winter cabbage seed, if shaded by day until up, may still be planted. Continue to plant corn, snap beans, cornfield beans and table peas, and save all garden seeds as they ripen.

JULY.—Make preparation for a fall garden. Continue to gather and store onions, shallots and Irish potatoes. Get your ground ready for winter cabbage; put in another crop of beets, also of rutabaga and other turnips; replant cabbage, celery, etc.

AUGUST.—Spinach, lettuce, etc., may be sown and snap beans and English peas planted; also melons and cucumbers for pickling; set out late tomato plants and earth up your celery; cauliflower, broccoli, etc., may be set out for winter use; continue to transplant celery, sow rutabaga and other turnips, beets, radishes, onion seed and onion sets.

SEPTEMBER.—Spinach, colza, lettuce and radishes may be sown; strawberry beds may also be prepared and plants set out; sow turnips—the Flat Dutch and Red Top are best—also onion seed and onion sets, salsify, and mustard and cabbage for winter use. Of the latter, Early York and other early sorts may be sown to set out the first of November. Make mushroom beds and plant the spawn the last two weeks.

OCTOBER.—Red Top turnips may be sown for winter use, but it is almost too late to bring the roots to much perfection, except on the coast. Those already planted may be cultivated and brought to a stand. Plant strawberry beds. Let the manure heaps be looked after and the garden tools made ready for spring work. Plant onion sets. Make mushroom beds and plant spawn the first two weeks.

NOVEMBER.—English broad beans and early English peas may be planted this month. Thyme, horseradish, etc., may be taken up and divided; strawberry beds planted, and ground manured and prepared for spring work; gather and bank sweet potatoes; plant onion sets and set out cabbage plants. Begin to plant and prune fruit trees; the earlier the vine is pruned after killing frosts the better.

DECEMBER.—Either prune your trees and plants yourself, or stand by and see that it is done properly. "The time to prune," says an experienced cultivator, "is when your knife is sharp," but the best time is when the leaves are off.

GARDEN SEEDS

BEST ADAPTED TO OUR SOUTHERN STATES.

ASPARAGUS SEED.

(Culture.—One ounce for sixty feet row. Soak seed twenty-four hours in warm water, and sow thinly in row one foot apart. Thin out seedlings to four inches in rows. Set out one year old seedlings as per culture of Asparagus Roots below.)

CHARLESTON FRENCH, OR PALMETTO—Rapid grower; keeps for long while in excellent condition; immense stalk, and since its introduction no Asparagus equals it. Packet, 5 cents; 4 ounces, 25 cents.

ASPARAGUS ROOTS.

(Culture.—Prepare in spring or fall, bed five feet wide, two feet deep, fill in manure and soil. Make three rows and set out roots six inches below surface and twelve inches in row. Every autumn dress with manure and salt after tops are cut. Bed should last twelve years. 100 roots set bed ten feet by forty feet.)

CHARLESTON FRENCH, OR PALMETTO—See description above. Roots bear transportation to any part of United States. There is no finer vegetable than Asparagus. A most profitable market crop about Augusta. 100 roots, \$1.00; 1,000 roots, \$1.00. We have special arrangements for large amounts.

BEANS—Bush, Snap or Dwarf.

For all Beans when sent by mail, add for postage: Half-pint, 5 cents; pint, 10 cents; quart, 15 cents.

(Culture.—Beans can be sown for succession from end of February, or sooner, until September. Bear till frost. Drop one bean every two or three inches, in rows eighteen inches apart. Cover two inches deep. Don't work while dew is on beans for fear of rust. One quart plants a 200 feet row; $1\frac{1}{2}$ bushels, one acre.)

DWARF GERMAN BLACK WAX—An old variety, and a great favorite with market gardeners and others. Tender, yellow wax pods. Papers, 2 for 5 cents; pint, 20 cents; quart, 30 cents.

EARLY MOHAWK SIX WEEKS—Our hardest bean; will stand some frost. Preferred for early planting. Long, green, flat pods. Papers, 2 for 5 cents; pint, 20 cents; quart, 30 cents.

EXTRA EARLY RED VALENTINE—An old, well known bean, with hosts of friends. Is ready for table use six weeks from planting. Round, green pods. No other bean is so largely sold to Southern truckers. Papers, 2 for 5 cents; pint, 20 cents; quart, 30 cents.

EXTRA EARLY REFUGER OR 1,000 TO 1—A seven weeks' bean; medium to late; large vine; favorite for canning and pickling; productive; round pod; good main crop. Pint, 20 cents; quart, 30 cents.

EARLY YELLOW SIX WEEKS—Hardy and very early; green pod; resembles Mohawk save in color; a leading sort. Papers, 2 for 5 cents; pint, 20 cents; quart, 30 cents.

CRYSTAL WAX—Color of pods very light green and semi-transparent; round curved, succulent, prolific, continuing long in edible condition. Packets, 5 and 10 cents; quart, 35 cents.

HENDERSON'S LIMA BUSH—The beans of this variety possess the same flavor as the running kind, and are borne heavily from early summer until frost. Pint, 25 cents; quart, 40 cents.

BEANS—Pole.

(Culture.—Plant in hills four feet apart each way, four or five beans to a hill; plant the eye down. One quart plants 150 hills; half bushel, one acre.)

KENTUCKY WONDER—A splendid early variety. Fine, vigorous, climbing well, and exceedingly prolific up to frost. Bears pods in clusters. Green pods, round, crisp, nine or ten inches long. It is the most profitable market gardener's beans for snap bean market. Sold only in bulk. Half-pint, 15 cents; pint, 20 cents; quart, 30 cents.

LARGE WHITE LIMA—Either green or dry this is the standard table vegetable, and the best shell bean known. Give it rich ground

and plenty of room. Half-pint, 15 cents; pint, 25 cents; quart, 40 cents.

SOUTHERN PROLIFIC—Strictly a Southern bean. Stands the Southern heat. Continuous bearer until frost. Pods seven inches long and flat; seeds dark yellow. Standard in this latitude. Favorite way to plant in the South is in damp low lands, among corn, and let the vines grow up the corn stalks. Papers, 2 for 5 cents; pint, 20 cents; quart, 30 cents.

SMALL LIMA OR CAROLINA SEWEE—Similar in every way to Large Lima, except that it is only half as large, seeds and pods being smaller. Largely grown in the South, and is immensely popular. Half-pint, 15 cents; pint, 20 cents; quart, 35 cents.

TALL BLACK GERMAN WAX—Yellow pods. Bears richly flavored, stringless pods of the same good quality as Dwarf German Wax. Papers, 2 for 5 cents; $\frac{1}{2}$ -pint, 15 cents; pint, 20 cents; quart, 30 cents.

BEETS.

(Culture.—One ounce plants 100 feet; four pounds, one acre. Soak seed twelve hours before planting. Can be sown pretty much all spring and summer. Sow one inch deep, in drills eighteen inches apart, thin out to eight inches in drill.)

EARLY ECLIPSE—The handsomest of the very early beets. Globe shaped, fine dark red color, rapid grower, small tops, purplish green foliage and red veins. Papers, 5 cents; ounce, 10 cents; 4 ounces, 20 cents; pound, 60 cents.

EARLY DARK BLOOD TURNIP—Trifle later than Eclipse. Flesh deep blood red, tender and fine flavored. The most generally used family beet. Papers, 2 for 5 cents; ounce, 10 cents; 4 ounces, 20 cents; pound, 60 cents.

EXTRA EARLY OR BASSANO—As early as Eclipse. Flesh pink with white streaks. Very juicy. Packet, 5 cents; ounce, 10 cents; 4 ounces, 20 cents; pound, 60 cents.

IMPROVED LONG SMOOTH BLOOD RED—Medium late. Often used for late summer planting and winter use. Papers, 2 for 5 cents; ounce, 10 cents; 4 ounces, 20 cents; pound, 60 cents.

HALF LONG BLOOD RED—Similar to Long Blood, but differs in size—being half long. Papers, 2 for 5 cents; ounce, 10 cents; 4 ounces, 20 cents; pound, 60 cents.

SILESIAN SUGAR WHITE—A sweet white beet preferred by some. Papers, 2 for 5

cents; ounce, 10 cents; 4 ounces, 20 cents; pound, 60 cents.

Beets for Stock, or Mangel Wurzel.

(Culture.—In Europe this is one of the necessary crops for cattle—500 to 600 bushels being grown to an acre. Sow five pounds to acre. Sow in rows two feet apart and thin out to twelve inches in row.)

NORBITAN GIANT—We have tried to get in this the largest stock beet that grows. A long red variety of great size. Flesh solid; a good keeper. Ounce, 10 cents; 4 ounces, 15 cents; pound, 40 cents; 5 pounds, \$1.50.

CABBAGES.

Possibly cabbages are the most universally grown of all vegetables for home consumption or shipping. The most critical truckers and gardeners will find our cabbage seed for heading qualities unexcelled.

Nearly the whole line of our cabbages are grown for us on Long Island by the two best known and the most reliable cabbage seed growers in the United States. There are no better cabbage seed in the world than those we offer.

On account of the extreme cold in January, 1899, three-quarters of the Cabbage seed crop was destroyed, consequently prices are higher than in the past season.

(Culture.—One ounce makes 3,000 plants; five ounces will plant an acre. Sow in beds almost any month in the year, usually from February to November. For winter crop, sow in August and September. Transplant deep, up to first leaf, in deep rich soil, and water plants well. Set out eighteen inches in row; rows thirty inches apart.)

EARLY JERSEY WAKEFIELD—Early and a well known favorite. Heads are conical shaped. Possibly the principal variety that is grown by truckers for early shipment, and by gardeners in general. Quantities of this cabbage grow off Charleston of twenty-two pounds weight, all solid heads. Papers, 2 for 5 cents; ounce, 15 cents; 4 ounces, 55 cents; pound, \$2.00.

IMPROVED EARLY DRUMHEAD—An intermediate kind between the cone shaped early and late varieties. Can be planted closely. Takes its name from its shape. Papers, 2 for 5 cents; ounce, 15 cents; 4 ounces, 55 cents; pound, \$2.00.

WILLET'S ALL-SEASONS SURE HEADER—One of the finest for second early or for late growing. Grows quickly to a large size and

heads surely. It is a true, sure, hard-header. Its name is an index of its character. Papers, 2 for 5 cents; ounce, 15 cents; 4 ounces, 55 cents; pound, \$2.00.

IMPROVED EARLY FLAT DUTCH—Not so early as the very earlier, and not so heavy as some, but very salable because of its flat shape; very extensively planted. Weighs from ten to twelve pounds. Papers, 2 for 5 cents; ounce, 15 cents; 4 ounces, 55 cents; pound, \$2.00.

EARLY WINNINGSTADT—A Prussian cabbage; a standard cone shaped, solid head, second early variety. Papers, 2 for 5 cents; ounce, 15 cts; 4 ounces, 55 cts; pound, \$2.00.

GREEN GLAZED—For late sowing. Glossy green leaves. Not so liable to insect attacks, and especially adapted for hot climates. Papers, 2 for 5 cents; ounce, 15 cents; 4 ounces, 55 cents; pound, \$2.00.

EARLY LARGE YORK—For very early sowing. An old English variety. Heads small and slightly heart shaped; rather dwarf. Can be planted closely—eight inches in row. Papers, 2 for 5 cents; ounce, 15 cents; 4 ounces, 55 cents; pound, \$2.00.

PREMIUM LATE DRUMHEAD—Sow in September. Very hardy and withstands cold. Large round heads, though sometimes flattened on top. Well known. Papers, 2 for 5 cents; ounce, 15 cents; 4 ounces, 55 cents; pound, \$2.00.

MARBLEHEAD MAMMOTH—Largest of all cabbage grown, though somewhat coarse. A late drumhead in shape; solid; an excellent keeper. Papers, 2 for 5 cents; ounce, 15 cents; 4 ounces, 55 cents; pound, \$2.00.

PREMIUM LATE FLAT DUTCH—The old favorite for fall and winter sowing. Grows low to ground; heads large, bluish green in color, broad and flat on top. Papers, 2 for 5 cents; ounce, 15 cents; 4 ounces, 55 cents; pound, \$2.00.

BUNCOMBE, OR N. C. WINTER—A firm, solid header and keeps well. A favorite in North Carolina. Either a spring or winter cabbage. Papers, 2 for 5 cents; ounce, 15 cents; 4 ounces, 55 cents; pound, \$2.00.

CARROTS.

(Culture.—One ounce will plant a 100 feet row; three pounds an acre. Soil must be fertile, deeply dug and light or sandy. Soak seed well. Sow in drills ten to twelve inches apart, so plants can be worked.)

CHANTENAY, STUMP ROOTED—Half long

rooted; scarlet; broad shoulders. Packets, 5 cents; ounce, 10 cents; 4 ounces, 25 cents.

IMPROVED LONG ORANGE—Roots long and deep orange color. Papers, 2 for 5 cents; ounce, 10 cents; 4 ounces, 25 cents.

Carrots for Stock.

(Culture.—Sow three pounds to the acre. These roots are often fifteen inches in circumference. Greatly enjoyed by stock and gives fine color to butter.)

VICTORIA, YELLOW—The largest, heaviest cropping and most nutritious yellow variety in cultivation. Easily gathered as the roots grow largely above the ground. 4 ounces, 25 cents; pound, 75 cents; 3 pounds, \$1.75.

CELERY.

(Culture.—One ounce makes 4,000 plants; four ounces to an acre. Grown here with profit extensively for market. Sow in May and June: also in August and September. Transplant when six inches high in three feet rows, six inches in row. When tall enough they should be covered with earth to bleach.)

GIANT, WHITE PASCAL—About two feet high. Nutty flavor. Stalks broad and crisp and stringless. Bleaches in five or six days. Packet, 5 cents; ounce, 20 cents.

NEW ROSE—Very hardy. Delicious flavor as most pink varieties are. Packet, 5 cents; ounce, 20 cents.

IMPROVED WHITE PLUME—Very early. White foliage. Needs but little banking. Not a winter variety. Packet, 5c; ounce, 20c.

COLLARDS.

(Georgia grown seed. United States seedmen supplied.)

Georgia grows the Collard seed for the United States; and the United States come each year to Georgia for her Collard seed. We are the largest Collard seed contractors in Georgia. Write us, stating quantity. Collards grow three to four feet high. Branch out widely and thickly. Leaves are cut and boiled as greens. New leaves taking place of old ones cut. Plants stand cold—leaves are more tender and sweet after frost. Every farmer's garden in Georgia grows Collards. Thousands of the negro garden patches grow nothing but Collards.

(Culture.—An ounce will produce about 3,500 plants. Sow in spring or summer as directed for cabbage, either in beds, to transplant when large enough, or in rows where intended to stand. Three or four feet each

way ought to be given the plants. Sixteen ounces to the acre.)

GEORGIA BLUE STEM COLLARD—The old-fashioned kind, known for a hundred years or more. The type of these have become run down and mixed. We have had our stock grown for us from an improved type. Papers, 2 for 5 cents; ounce 10 cents; 4 ounces, 35 cents.

GEORGIA WHITE CABBAGE COLLARD—Whiter and more tender than the Blue. Introduced nine years or more ago. Three-fourths of them bunch or head up in winter. Papers, 2 for 5 cents; ounce, 10 cents; 4 ounces, 35 cents.

CORN.

GARDEN, SWEET TABLE—Adam's Early, Mammoth Sugar, Stowell Evergreen. All of above papers, 2 for 5 cents; pint, 15 cents; quart, 25 cents; peck, \$1.00. Postage is 10 cents pint, and 15 cents quart.

CUCUMBERS.

(Culture.—One ounce for eighty hills, 1½ pounds, one acre. Plant after frost half-inch deep, and thereafter every two or three weeks for succession, in well manured hills, four feet apart. Thin to four plants in hill.)

LONDON LONG GREEN—Long and crisp; not many seed. Make fine pickles. Papers, 2 for 5 cents; ounce, 10 cents; 4 ounces, 25c.

EARLY FRAME—Papers, 2 for 5 cents; bulk price same as Long Green.

EARLY WHITE SPINE—Papers, 2 for 5 cents; bulk price same as Long Green.

EXTRA EARLY CLUSTER—Papers, 2 for 5 cents; bulk price same as Long Green.

JAPANESE CLIMBING—A Novelty. Grows seven feet high on a pole. Same price as Nichol's Medium Green.

GIANT PERA—One of the largest green cucumbers. Skin perfectly free from spines. Flesh crisp and white. Ounce, 10 cents; 4 ounces, 25 cents; pound, 85 cents.

EGG PLANTS.

(Culture.—One ounce to 100-yard row; four ounces to one acre. Start seed in hotbeds or boxes in February or March. Set out plants early in warm weather, in rows two by three feet apart.)

NEW YORK IMPROVED PURPLE—Deep lustrous purple. Standard. Packet, 10 cents; ounce, 35 cents.

PEARL WHITE—(Seed grown in Georgia.) Can supply the trade. A large, new, creamy

white, delicately flavored Egg Plant. Preferred above the others. Packet, 10 cents; ounce, 35 cents.

KALE.

(Culture.—One ounce for 2,000 plants; two pounds to one acre. For spring and winter greens sow from August to October, in drills two feet apart. Thin out to eight inches in row, and cultivate as cabbage.)

DWARF GREEN CURLED—Most tender and delicate of all the cabbage family. Improved by frost. The leaves look like an immense feather. Papers, 2 for 5 cents; ounce, 10 cents; 4 ounces, 30 cents.

LETTUCE.

(Culture.—One ounce for 250-foot drill; five pounds to one acre. Sow in beds almost any month in the year. Reset plants eight inches apart in rows.)

DEACON CABBAGE—Has large, solid head. Cabbage Lettuce for summer use. Papers, 2 for 5 cents; ounce, 15 cents; 4 ounces, 40 cents.

IMPROVED HANSON—Crisp, tender, curled variety. Stands the hot sun well. Weighs two to three pounds. Papers, 2 for 5 cents; ounce, 15 cents; 4 ounces, 40 cents.

SILVER BALL—Foreign variety. An all-the-year-round Lettuce. Heads are silvery white, solid, firm and of exquisite flavor. Papers, 2 for 5 cents; ounce, 15 cents; 4 ounces, 40 cents.

MELON—Cantaloupe.

THE NIXON—Georgia grown seed. United States seedmen supplied. Originated in this county, and drove out every other cantaloupe for home and market use. Weighs eight to twelve pounds. Flesh crisp and sweet. Rough skin. Good shipper. Deep ribbed; rind and flesh yellow. Ounce, 10 cents; 4 ounces, 35 cents; pound \$1.00.

ROCKYFORD CANTALOUPE—Shippers do not dare ship North now any but this melon. The most famous melon to-day in the United States. We sold ninety pounds of seed to a South Carolina party last year who claims to have netted about \$5000. We get our seed grown for us at Rockyford, Colorado, and we suppose we have the largest contract there for 1900 seed of any Southern seed house. Melon is small, sweet and can be eaten to the rind. Distinctive flavor; prolific. One pound, \$1. Special prices to heavy growers.

NETTED NUTMEG—Shaped like a nutmeg. Highly scented. Suits the garden especially.

Long and well known. Papers, 2 for 5 cents; ounce 10 cents; 4 ounces 25 cents; pound, 75 cents.

MUSTARD.

(Georgia grown seed. United States seedsmen supplied.)

(Culture: One ounce to 100 feet. Sow in fall, winter or spring, in rows or shallow drills. Press earth well down. Ready for use in 5 or 6 weeks.)

OSTRICH PLUME MUSTARD—(Seed grown in Georgia. U. S. seedsmen supplied.) Most beautiful mustard extant. Originated in Augusta, Ga. It is being introduced by us to seed trade of U. S. Many of them this year are putting in novelty lists. Plumes are tender, very long and finely crimped. Pretty as an ornamental plant. Look like ostrich plumes. Plant large—often 5 or 6 pounds. The most perfect mustard. Sold only in bulk. Ounce, 10 cents; 4 ounces, 30 cents; pound, 75 cents.

SOUTHERN GIANT CURLED—(These seed grown in Georgia. United States seed trade supplied.)—The Southern favorite. Hardy and large leaf. Papers, 2 for 5 cents; ounce, 10 cents; 4 ounces, 25 cents; pound, 60 cents.

CHINESE BROAD LEAF—Leaves broad, sometimes twelve inches long and crimped. The leaves when cooked have an agreeable flavor like spinach. One ounce, 10 cents; 4 ounces, 25 cents; pound, 75 cents.

OKRA.

These seed are grown in Georgia. We can supply the United States seed trade. Large amounts dealt in—spot or contract.

(Culture.—One ounce to fifty-foot drill; ten pounds to one acre. Sow late in spring in drills two feet apart, and leave one plant to every fifteen inches.)

LONG GREEN—Pods are dark green, and stalks tall. Papers, 2 for 5 cents: ounce, 10 cents; 4 ounces, 25 cents; pound, 50 cents.

NEW DWARF GREEN PROLIFIC—Early and will bear till frost. Papers, 5 cents; ounce, 10 cents; 4 ounces, 20 cents; pound, 50 cents.

NEW WHITE VELVET—Tender white pods. Pods round and smooth. A distinct variety. Papers, 2 for 5 cents; ounce, 10 cents; 4 ounces, 20 cents; pound, 50 cents.

ONION SEED.

Our seed comes from Southern California. Northern seed will not mature onions in this latitude.

(Culture.—One ounce to 100-foot row; four pounds to the acre. For onions sow in February, March, September or October in rich, sandy soil, in drills one foot apart. Thin when up to five or six inches. Cover seed half-inch in planting, or sow seed in hotbeds in winter, and transplant in spring. They grow off quickly.)

MAMMOTH SILVER KING—Italian. One of the largest; often twenty inches in circumference and four pounds in weight. Rapid grower; good in one season. Flattened in shape and is silver white. Packet, 10 cents; ounce, 20 cts; 4 ounces, 75 cts; pound, \$2.00.

PRIZE TAKER, OR YELLOW GLOBE SPANISH—Globe shape; rich straw color. Weighs three to four pounds. Mild, delicate and a good keeper. This variety has become famous all over the world. Packet, 10 cents; ounce, 20 cts; 4 ounces, 75 cts; pound, \$2.00.

ONION SETS.

We are the largest dealers in Onion Sets. Merchants in Augusta's territory can get the lowest wholesale quotations by writing. On retail mail orders, add 10 cents quart for postage.

(Culture.—One quart to 20-foot drill; three bushels to acre. Sow early in spring or September or October, four inches in row—rows twelve to fifteen inches apart.)

DANVERS YELLOW—Quart, 15c; peck, \$1.
WHITE SILVER SKIN—Quart, 15 cents; peck, \$1.00.

WHITE MULTIPLIER—(Grown in Georgia. We are heavy contract dealers. The United States seed trade supplied.) Grows like potatoes in a hill. Yield enormously; productive. Mild. Quart, 15 cents; peck, 85 cents.

YELLOW MULTIPLYING SHALLOT—(Grown in Georgia. The United States seed trade supplied.)—Plant in September or October. By March or April each Shallot has grown into a bunch of forty to sixty Shallots. The tops and bottoms together are eaten. When tops die down in May or June, dig and store in dry place. Use as seasoning during the summer. Plant remainder in fall. Quart, 15 cents; peck, 85 cents.

PARSLEY.

(Culture.—One ounce to 150 feet. Soak seed. Sow in spring to July. Thin out in drills to four inches apart.)

CHAMPION MOSS CURLED—Bright green. Beautiful variety. Papers, 2 for 5 cents; ounce, 10 cents.

PARSNIP.

(Culture.—One ounce to 150-foot drill; four pounds to the acre. Drill in spring in rows eighteen inches apart. Thin out to six or eight inches in row.)

HOLLOW CROWN, OR SUGAR—Roots long and smooth. The best either for table or stock feeding use. Papers, 2 for 5 cents; ounce, 10 cents; 4 ounces, 20 cents.

GARDEN PEAS.

Our peas are grown for us on the Canada lakes—free from weevils and holes. We deal in them in large quantity at wholesale. If you order sent by mail, add for postage, 5 cents per half-pint; pint, 10 cents; quart, 15 cents. Buy Peas for home use always in bulk—not papers.

(Culture.—One quart to 150 feet row; 1½ bushels per acre. Peas can be planted here from January to August. Sow in singly or double rows, 4 feet apart and 1 inch in row.)

FIRST AND BEST OR PHILADELPHIA EXTRA EARLY—Perhaps the earliest Pea cultivated. Productive and well flavored. Papers, 2 for 5 cents; ½-pint, 10 cents; pint, 15 cents; quart, 25 cents; ½-peck, 75 cents, peck, \$1.25.

MAUD S. EXTRA EARLY—This is undoubtedly one of the finest early Peas ever introduced, and has gained quite a reputation for its extreme earliness, productiveness and fine flavor. Vigorous grower, stands severe changes of weather, vines about two-and-a-half feet high, and generally loaded with fine, large, well filled pods; another great advantage it possesses is the uniformity of ripening, which reduces expense in marketing the crop. Quart, 25 cents; peck, \$1.25.

CHAMPION OF ENGLAND—Second early; wrinkled. One of the finest varieties for family use. Standard. Sow thick. Papers, 2 for 5 cents. Same bulk price as Philadelphia Extra Early.

YORKSHIRE HERO—Wrinkled; extra early. An English Pea; excellent, productive and luscious. Large Pea: vines spread. Sow thinly. Papers, 2 for 5 cents; ½-pint, 10 cents; pint, 15 cts; quart, 25 cts; ½-peck, 75 cts.

LARGE WHITE MARROWFAT—Main or late crop. A large heavy Pea. A good cropper; grown everywhere. Papers, 2 for 5 cents; ½-pint, 10 cents; pint, 15 cents; quart, 20 cents; ½-peck, 60 cents; peck, \$1.00.

BLACK-EYED MARROWFAT—Tall, hardy and prolific. Abundant fruit. Large Pea. Papers, 2 for 5 cents; bulk price same as White Marrowfat.

MCLEAN'S PREMIUM GEM—Early dwarf; one foot high; wrinkled Pea: prime favorite. Papers, 2 for 5 cents; bulk price same as Yorkshire Hero.

PEPPER.

(Culture.—One ounce to 1,500 plants; four ounces to the acre. Plant in early spring in hotbeds or boxes. Set out in rows two feet apart and eighteen inches in row.)

SWEET GOLDEN DAWN OR GOLDEN BELL—Bell shaped; mild flavor; can be eaten like an apple: golden yellow; very productive. Papers, 2 for 5 cents; ounce, 25 cents.

BULL-NOSE OR SPANISH MONSTROUS—A favorite for pickling or for mangoes. Rind thick and fleshy. Papers, 2 for 5 cents; ounce, 25 cents.

RED CHERRY—Looks like a cherry: used as pickles or dried as cayenne. Packet, 5 cents; ounce, 25 cents.

NEW CHINESE CELESTIAL—Chinese. The plant is beautiful and ornamental; pods of a deep scarlet and two to three inches long. Packet, 5 cents; ounce 25 cents.

POTATOES.

IRISH AND SWEET—See under head "Field Crops."

PUMPKIN.

(Culture.—One quart to 400 hills. Plant fields in March. Generally planted here in low lands amid corn. Three pounds for one acre.)

IMPROVED CASHAW—Striped Crookneck. For pies and baking. Salmon flesh. Can be kept from one season to another. Ounce, 10 cents; 4 ounces, 20 cents; pound, 60 cents.

TENNESSEE SWEET POTATO PUMPKIN—Cream white; weighs 12 pounds; productive; will keep here through the winter until early summer. A fine dish, not appreciated in the South. Ounce, 10 cents; 4 ounces, 20 cents; pound, 60 cents.

Pumpkin for Field.

EXPOSITION PRIZE—Magnificent Jumbo pumpkin—the largest we know of. Ounce, 10 cents; 4 ounces, 20 cents; pound, 60 cents.

RAPE, OR GEORGIA SALAD.

(Culture.—One ounce to 150 feet; drill thick in spring, rows two feet apart, or sow in August and September.)

The best of spring greens when boiled. Thin out to six inch plants and cook.

Afterward cut off remaining tops and use. Tops grow out again for cutting. When sown in fall greens may be cut in about six weeks. Ounce, 10 cents; 4 ounces, 20 cents.

RADISH.

(Culture—One ounce to 10 feet; three pounds to acre. Sow in drills in early spring and to June for succession. Thin out as needed. Row 12 inches apart. Sow in early fall or winter.)

LONG SCARLET SHORT TOP—Two papers, 5 cents; ounce, 10 cents; 4 ounces, 25 cents; pound, 65 cents.

EARLY SCARLET TURNIP—Two papers, 5 cents; ounce, 10 cents; 4 ounces, 25 cents; pound, 65 cents.

FRENCH BREAKFAST—Small scarlet, olive shaped. Two papers, 5 cents; ounce, 10 cents; 4 ounces, 25 cents; pound, 65 cents.

CHINA ROSE—WINTER SCARLET—Bright rose color; flesh firm and piquant; fine for winter use. Two papers, 5 cents; ounce, 10 cents; 4 ounces, 25 cents; pound, 75 cents.

SALSIFY, or VEGETABLE OYSTER.

(Culture—One ounce to sixty feet. By all means grow this delicious vegetable. Sow thickly in spring. Drill twelve inches apart. Cover seed one inch. When up thin out to five or six inches in row. Roots can stay in ground; good for use all winter till spring. Can also sow in September or October. A good market crop.)

NEW MAMMOTH SANDWICH ISLAND—The largest and the superior kind. Packages, 5 cents; ounce, 15 cents; 4 ounces, 40 cents; pound, \$1.25.

SPINACH.

(Culture—One ounce to 150 feet drill; ten pounds to acre. For winter sow in drills one inch deep, rows nine inches apart. In September and October thin out by using for table. For summer use sow early in spring. A good trucker's crop all the year.)

BLOOMSDALE SAVOY CURLED LEAF—Large bright green curled leaf; stands worst winter. Packet, 5 cents; ounce, 10 cents; 4 ounces, 20 cents; pound, 45 cents.

NEW ZEALAND SUMMER—Scald and soak seed in hot water. Distinct. Grows well in hot weather. Packet, 5 cents; ounce, 10 cents; 4 ounces, 30 cents; pound, 60 cents. In this latitude this spinach is a perennial.

SQUASH.

(Culture—One ounce to forty hills; three pounds to one acre. Sow in hills same time as cucumbers and melons. Bush varieties, three to four feet apart; running kind six to nine feet apart. Winter kinds are to be stored through winter, used as wanted; a standard dish in the North.

EARLY WHITE BUSH SCALLOP—Early, well known by all. Ships well. A summer dwarf. Papers, 2 for 5 cents; ounce, 10 cents; 4 ounces, 20 cents; pound 60 cents.

SUMMER CROOKNECK—Early. Fruit yellow. Hard shell, warty excrescences. Papers, 2 for 5 cents; ounce, 19 cents; 4 ounces, 20 cents; pound 60 cents.

MAMMOTH CHILI WINTER—Grows to an immense size. Rich orange yellow. The Jumbo of the squash family. Has grown to two hundred pounds in size. Keeps well in winter. Packet, 10 cents; ounce, 15 cents; 4 ounces, 40 cents; pound, \$1.25.

FORDHOOK WINTER—Fine quality; thin skins. Can be used at any stage of growth in summer, and at maturity kept through the winter. Valuable new variety. Packet, 5 cents; ounce, 10 cents; 4 ounces, 25 cents.

TOMATO.

(Culture—One ounce to 2,500 plants; three ounces, one acre. Sow in hotbeds or boxes January or February. Transplant after frost when two inches high in open ground. Succeeds fifty per cent. better when trained to sticks or frames. When thus trained all limbs (they appear in axil between leaf branch and stalk) must be pinched off. This method leaves the little fruit stems and the larger leaf branches. The vine will thus grow ten feet high and fruits to the top as season advances—till frost.)

LIVINGSTON'S FAVORITE—Large, smooth, productive; good shipper. Does not crack open. Papers, 2 for 5 cents; ounce, 20 cents; 4 ounces, 65 cents; pound, \$2.00.

NEW EARLY ACME—Pinkish purple; heavy bearer; round, solid, medium size. Bears till frost. Thin skin. Papers, 2 for 5 cents; ounce, 20 cents; 4 ounces, 65 cents; pound, \$2.00.

MIKADO, OR TURNER'S HYBRID—Large— $\frac{1}{4}$ to $1\frac{1}{2}$ pounds—smooth, solid, purplish red; peculiar foliage. Papers, 2 for 5 cents; ounce, 20 cents; 4 ounces, 65 cents; pound, \$2.00.

SELECTED PARAGON—A second early; bright crimson; resembles the Acme in size and shape; bears transportation; fine canning tomato. Papers, 2 for 5 cents; ounce, 10 cts; 4 ounces, 50 cts; pound, \$2.

GOLDEN QUEEN—Yellow flesh; superior, distinct flavor; beautiful fruit. Papers, 2 for 5 cents; ounce, 20 cents; 4 ounces, 65 cents; pound, \$2.00.

TURNIPS—Spring Sowing.

To Merchants in Augusta Territory:

We make large annual growing contracts in Turnip Seed. Can supply you at lowest wholesale prices.

Our seed are the best American grown.

(Culture—One ounce for 200-foot drill; 1½ pounds, one acre. Sow in drills which are fourteen inches apart. For fall and winter turnips, from July 20 to September 15.)

EARLY WHITE FLAT DUTCH—STRAP LEAF—Spring Sowing. Papers, 2 for 5 cents; 4 ounces, 12 cents; pound, 35 cents.

EARLY PURPLE TOP—Strap leaf. Spring sowing. Papers, 2 for 5 cents; 4 ounces, 12 cents; pound, 35 cents.

TURNIPS—Fall and Winter Use.

Purple Top Globe, Yellow or Amber Globe, •White Norfolk, White Cow-Horn, Yellow Aberdeen, White Snow Ball. 4 ounces, 12 cents; pound, 35 cents. All of above marked. We put up also in papers, 2 for 5 cents.

TURNIPS—Winter Use.

(Seed grown in Georgia. United States seed trade supplied.)

NATIVE GEORGIA TURNIP—This is an old fashioned turnip; cold never kills it. It is white fleshed, and as big in size as the Ruta Baga and as hardy as the Ruta Baga. Turnips remaining unused put out large new spreading tops in January or February, that which are eaten as spring greens. These make a bitter pot-licker which is highly prized by some. We've had much demand for this turnip. It has not been listed by any one heretofore. We are having a big lot carefully grown. 4 ounces, 15 cts; pound, 45 cts.

TURNIPS—Fall Sowing.

SEVEN TOPS—(Seed grown in Georgia. United States seed trade supplied.)—This state grows the Seven Tops for the United States. Named because of the habit of stooling or branching into seven tops. Makes a great amount of greens or salad. Do not make big roots. We are Southern headquarters for Seven Tops.

TURNIPS—Ruta Bagas.

YELLOW IMPROVED PURPLE TOP RUTA BAGA—Papers, 2 for 5 cents; 4 ounces, 12 cents; pound, 35 cents.

WATERMELONS.

All these seed grown in Georgia. United States seed trade supplied. We are in the largest and the very best melon shipping district in the United States. Augusta inaugurated in 1867 melon shipping business Northward. Our seed are taken from twenty pound melons and above—eight to ten melons to one pound seed. We sell to the largest growers and largest seedmen in United States.

(Culture—Dig holes two feet deep and fill with rich mould and manure. Plant in spring ten seeds to hill and thin out to two; one pound to an acre.)

BLUE GEM OR GLOUSSER—The coming shipping melon in United States. As good a shipping melon as Kolb Gem. Quality far better flavor and sweeter. A far better keeper. More large melons and less culls on vines. Somewhat longer and heavier than Kolb Gem. Very dark bluish green rind with small grayish stripes. Bright red flesh. Seed black. Mr. T. H. Johnson, of South Carolina, the largest melon shipper possibly in the South, says: "I ship yearly two hundred and fifty cars—three hundred thousand melons. I regard Blue Gem as good a shipper as Kolb Gem, while quality of meat is far better. Will keep longer than any known melon. I gave twenty-five dollars per car more this year for them than I did for Kolb Gem." Ounce, 10 cents; 4 ounces, 35 cents; pound, \$1.00.

GENUINE AUGUSTA RATTLESNAKE—This Melon seems to deteriorate the second year when grown elsewhere than in this county, where originated. The genuine seed should be had each year from this county. This was the original melon shipped North in 1867, which so whetted the Northern appetite for watermelon. Is an elongated green striped melon. Good size. Seed white with black ears. Fresh crisp and excellent. A choice home melon. Ships with careful packing. Ounce, 10 cents; 4 ounces, 35 cents; pound, \$1.00. Ours are highest type of seed.

BRANCH'S RATTLESNAKE—Mr. B's home near Augusta, is the birth place of the Rattlesnake. He selects his seed from only the largest of his melons, and advertises his stock as fancy seed, and gets a higher price. His seed have been kept pure thirty years. His melons were pronounced the finest at the

Tennessee Centennial. Ounce, 10 cents; 4 ounces, 35 cts; 8 ounces, 65 cts; pound, \$1.25. All postpaid to any office in the United States.

AUGUSTA ROUND WHITE—New. Earliest melon in United States. Matures here June 12th to 15th. All others mature about July 4th. Best and earliest home market melon known. Not a good shipper. Short vines, but heavy bearers. Plant thick. Tender rind. Flesh light red. Sweet, brittle, good flavor. Shape round. Color whitish. Melons twenty to fifty pounds. A great acquisition among melons. Bears on vines continuously during season. This melon is grown here exclusively by all our market men for the early market. Only listed by us. Ounce, 10 cents; 4 ounces, 35 cents; pound \$1.00.

THE JONES MELON—Rind dark; flesh bright red. Almost round in shape. Rind trifle thicker than two above melons. Sixty-five to seventy pounds frequent size for this melon. Originated near us only a few years ago, yet it has sprung into the widest popularity, and is listed in all the United States seed catalogues as one of the very best. Ounce, 10 cts; 4 ounces, 35 cts; pound, \$1.

AUGUSTA SUGAR LOAF—A greenish white, elongated melon with crisp red flesh, with as thin a rind as Rattlesnake. Grows to an immense size—a whole market wagon load running often to sixty pounds each. Originated around Augusta. It's a beauty to look at and a delight to eat. Ounce, 10 cents; 4 ounces, 35 cents; pound, \$1.00.

PRIDE OF GEORGIA—An exceedingly large, round, green melon; flesh crisp and red. You will find occasionally on it small rough, slightly scaly spots. This melon is close kin to the Jones melon, and is a handsome melon inside and outside. Ounce, 10 cents; 4 ounces, 35 cents; pound, \$1.00.

KOLB GEM—Color a dark green; bright stripe; very nearly round; rind thick, ensuring perfect shipping qualities; flesh of a medium red and firm. Thirty pounds is a fair size. This is the standard universal shipping melon in the United States. Ounce, 10 cents; 4 ounces, 25 cents; pound, 75 cents.

SOUTH CAROLINA BRADFORD—We have some calls for this old time melon lately received. Price same as the Jones.

EDEN MELON—This melon by some shippers is thought to be as good or better than Blue Gem, far better than Kolb Gem. This melon has such a tremendous sale that we have had a large amount grown for us of high grade Seed and can supply all demands. Price same as Blue Gem.

TRIUMPH—Said to be the largest melon now grown. We can supply you from our finest special grown seed. Same price as the Blue Gem.

FLORIDA FAVORITE—A favorite Melon. Same price as Blue Gem.

UTAH—Almost a black rind and very red meat. Augusta market likes this Melon. Same price as Blue Gem.

SCALYBARK, LORD BACON AND ALECKLY SWEET—We can supply these well-known Melons in largest amount.

NOTE ON MELON SEED—Being in communication with all reliable melon seed growers in the state, we will quote prices on melons not in catalogue on request.

WARNING TO SEEDMEN—We warn Northern and Western seedmen from selling to their Southern trade Watermelon seed grown in the States of Oklahoma and Kansas, and other Western States. Such seed produces melons in the South with hard, white spots in the hearts. The melons do not mature. Thousands of dollars were lost by Southern growers from these seed.

ECONOMICAL PLANTS.

ORNAMENTAL CASTOR OIL BEAN—Ounce, 10 cents; pound, 65 cents.

PAPER SHELL PECANS—Largest. Pound, 75 cents.

WATER GOURD—Long handle—three feet. Packet, 10 cents. Large Sugar Trough—Packet, 10 cents.

DISHCLOTH GOURD—(Luffa Acutangula)—Grown in Georgia. We supply United States seed trade. Eat before maturity like squash. The dried interiors are sponge-like and durable—good for bath, washing, scrubbing, massaging purposes, and so sold. The immense vine can be trained to wall or arbor. The negroes of the South call them Rheumatism Rags. At the Hot Springs, Ark., in the hot baths for rheumatism they are prescribed. Package, 10 cents; ounce, 30 cents.

RUSSIAN SUNFLOWER SEED—Sow until August, five pounds to one acre. Great improvement over the small sunflower. Some are eighteen inches in diameter. Ornamental. Large seeds. In Russia used for oil. Known here as the best of all poultry foods—forty to fifty bushels per acre. In cities it is the parrot's food. We keep this seed in large quantities. Four ounces, 7 cents; pound, 15 cents; 5 pounds, 50 cents.

▶FORAGE CROPS◀

The South has a world of wealth in her varied Forage Crops. Their usual culture is simply to sow in April thinly in drills—rows, three feet apart—cutting the plants and feeding it when two or two and a half feet high, and recutting it as it grows out; three or four cuttings a season. For bushel prices—fifty pounds.

PEARL OR CAT-TAIL MILLET—(*Penicillaria Spicata*.) These seed grown in Georgia. The U. S. seedmen supplied in largest amounts. We are largest dealers. No other plant makes so much forage as this. Seven cuttings can be had from one planting about Augusta in one season. Total of three cuttings green forage per acre at Georgia Experiment Station, 52,416 pounds. The U. S. Agricultural Bureau has increased its sales largely. Demand could not be supplied in 1897. Stools at ground. Thick foliage. Heads not eaten. This is by far the most popular of all the green eaten millet. One pound, 20 cents; five pounds, one-quarter acre, 75 cents.

EARLY AMBER SORGHUM—We wholesale this in large amounts in Augusta territory. We wholesale few things in our house in larger quantities than the Sorghum. Almost a Trinity plant: three most distinct cultures: First. Green forage. Second. Cutting it when ripe and saccharine and feeding it to stock, or storing it for them. Third. Grinding it for syrup. This is the earliest sorghum. Fifty pounds to bushel. Sorghum is not appreciated in Georgia as it is in the West, and in Texas and in Tennessee. We have had trouble in getting pure amber seed. This year we have a splendid reliable Georgia grower. Do well sown with cow peas broadcast, or can be broadcast alone. Sow twenty pounds to one acre. One pound, 10 cents; ten pounds, one-half acre, 75 cents.

EARLY ORANGE SORGHUM—Yields heavier than Amber. Syrup, too, in finer flavor. Georgia Experiment Station makes total three cuttings green forage per acre 42,018 pounds. Weight and price same as Amber.

We wholesale large amounts to Augusta territory merchants of sorghums.

WHITE KAFFIR CORN—Georgia Experiment Station, three cuttings, total 32,034 lbs. per acre. It grows from four to five feet high, making a straight upright growth. It has a stalky stem, with numerous wide leaves. The stalks are green till frost, and are brittle and juicy, not hardening like other varieties of sorghum, making excellent fodder, either green or dried, which is highly relished by cattle, horses and mules. For the grain sow in rows three feet apart, three to five pounds of seed to the acre. For fodder, sow one-half bushel to one bushel, either broadcast or in drills. Invaluable for sowing along with cow peas, as they hold vines up. All can be cut at same time. One pound, 15 cents; five pounds, 65 cents. Makes a good combination sown with cow peas.

WHITE MILLO MAIZE, or BRANCTING DHOORA—Total three cuttings green forage at Georgia Experiment Station 51,792 pounds per acre. An immense producer of fodder. Stools largely, sometimes as many as ten to fifteen shoots from one seed; can be cut for green feed several times a season, yield of grain thirty bushels to the acre on land that will make fifteen of corn. Plant in rows four to five feet apart, dropping three to five seed eighteen inches apart in rows; plant eight to ten pounds seed to acre. Cultivate as corn. Price, pound, 15 cents; five pounds for 65 cents. Makes good combination sown with cow peas.

TEOSINTE—(*Euchalaena Luxurians*) —(U. S. wholesale seed trade supplied.) Many growths per season. Mississippi Experiment Station reports twenty-two tons per acre green forage product. One seed makes thirty to fifty stalks. On rich land grows fifteen feet high, and produces a larger amount forage than any known plant; 10 per cent. saccharine. Seeds only in extreme South. Plant in April, 5x6 feet; cultivate as corn. One ounce, 15 cents; one-quarter pound, 50 cents; one pound, \$1.50. Three pounds, one acre.

DWARF ESSEX RAPE—In England and Germany this is the universally grown forage crop. Sown for pasturing

lambs and sheep, and also for cows—no crop there equals it. No crop is so fattening—a lamb growing seven or eight pounds a month. Sow five pounds to ten pounds per acre in spring or fall—broadcast or drill in damp lands—or drill in rich uplands. Sown in August it makes by January and February an enormous amount green food two or three feet high and branching. Thin it out in fall when small and eat as spinach. One pound, 20 cents; five pounds, 75 cents.

GERMAN MILLET OR GOLDEN MILLET—(*Setaria Italica*)—fifty pounds to bushel. Sow fifty pounds to acre. Sow broadcast after oats in spring on rich ground. Cut before seed harden. Grows three to five feet high. It is widely sown; for no other forage or hay can be produced so heavily or quickly as this—four to six tons per acre in rich ground. Twenty-five pounds for one-half to one acre, \$1.00. (Price for large amounts vary largely each year.) German Millet only makes one cutting or crop. We wholesale it largely to Augusta territory merchants. Can be sown with cow peas.

HAY FORAGE COMBINATION—Any kind of stock are fond of this. A few acres of it will make a world of stuff. Broadcast put in half bushel cow peas, disc or plow in. Then cross with three pecks of German Millet and half peck Sorghum, and brush or roll in. Cut and cure when millet is in dough.

VELVET BEAN—(*Canavallia* family)—(Seeds only in extreme South. U. S. seed trade supplied.) The great Florida acquisition in forage line. Is sown universally in orange groves. A powerful soil enricher on poor soil. Grows luxuriantly on poor soil. Green vines or dry hay relished by all cattle. For replenishing worn out land large growers say it largely excels cow peas. Vines form a mass three to four feet high, and run twenty feet or more; large nodules on the roots; three to five beans in each pod; over 1,000 beans often on a vine. The Florida Experimental station reports 16,680 pounds of green forage per acre. Will eradicate other grasses; keeps down weeds. Plant spring or summer; three feet by five feet, several beans to hill; one peck to acre; cultivate like cow peas in every way.

MISCELLANEOUS FIELD AND FARM SEEDS

FIELD CORNS—We make a specialty of Field Corns—wholesaling them in large quantities to merchants in Augusta territory at lowest prices. Six quarts to acre; bushel, 56 pounds; unshelled, 70 pounds. Write for wholesale prices. Postage, pint, 10 cents; quart, 15 cents.

PENNSYLVANIA YELLOW DENT CORN—We do an immense business in Dent corns with Augusta territory merchants. Well known. Our earliest field corn. Meal can be had from it latter part July, being thus valuable to farmers. Has reputation of not being so prolific as other corn, but we never saw finer fields than about Augusta in 1898. Two quarts, 25 cents; peck, 60 cents; bushel, \$1.75.

PENNSYLVANIA WHITE DENT CORN—Same as above, only grain is white—which some prefer. Same price as Yellow Dent. Many plant this for early garden use.

COCKE'S PROLIFIC CORN—Originated by late General Cocke. The best corn known in Virginia. Flinty, white, heavy. Large, tall stalks. Much fodder. Two ears. In swamps it has grown 140 bushels shelled corn per acre. We get our seed from North Virginia. This corn stood highest test at Georgia Experiment Station for several years, and also other Southern State Experimental Stations. This corn has given great satisfaction here for several years. Medium early. Two quarts, 25 cents; peck, 60 cents; bushel, \$1.75.

MEXICAN JUNE CORN—(Georgia grown.) (U. S. seed trade supplied.)—Do not plant before June 1st to 15th. Grows ten to fifteen feet high. Full eared. Large blades. Fine ears, white corn. Makes finest late roasting ears. No other corn can be planted so late as this. No other corn grows so tall and makes such an amount of late forage. Bushel, \$2.50; peck, 75c.

COTTON.

All of our cotton seed are grown in Georgia. We are in position to stock up U. S. seedmen with almost any variety and in any quantity. Highest grade. Augusta is the second largest inland cotton market in the world, and the largest cotton manufacturing city in the South. Cotton thirty pounds to bushel. We have supplied the U. S. Agricultural Department for four or five seasons for their free cotton seed distribution. We shipped to Southern Europe the largest cotton shipment for seed purposes ever made. We export to all portions of the world cotton seed.

PETERKIN IMPROVED COTTON (Short Staple)—This cotton is grown about Augusta more, perhaps, by advanced farmers, than any other kind. Excellent staple. Large bolls. Small seeds. Branching, open growing and prolific. Twenty per cent. of the seed slip their lint—that is, are free wholly of lint, and are smooth and bare. To untinted the seed look mixed. Yield of lint is about 40 per cent. This cotton fruits through the whole season. A partial dry season does not largely affect the crop. Distributed by U. S. government in free seeds many years. This is the most largely sold of all cotton. We know no better stand by in the list, and recommend it highly. One bushel, \$1.00; five bushels, \$4.00.

HAWKINS' COTTON (Short Staple)—Distributed many years by U. S. government in free seeds. Has the distinction of being possibly the tallest of all cotton; three large limbs at bottom. Being a tall grower it has a long tap root, which resists drouth well. Small seed—some light gray, some green. Yields 33 to 40 per cent. An early cotton with superior lint. Big bolls, gathered easily. Prolific. A cut before us of Hawkins' Cotton from life shows over 400 bolls well developed on one stalk. Mr. Hawkins has been steadily improving year by year this cotton to the present—carefully selecting it each year. Our seed are absolutely pure. Bushel, \$1.00; five bushels, \$4.00.

KING'S IMPROVED COTTON (Short Staple)—Has stood highest test at Georgia Experiment Station. Only been on the market three or four years, but no other kind sold so largely in 1897. The earliest of all cotton. Few limbs and short. Plant on heavy, good land, thicker than any other cotton. Bolls

literally cover the rather small plant. First crop comes on all at once—pretty well out by September 15th. Makes second crop—plant then growing straight up and tall. Plant erect. In 1890 the originator made in North Carolina three bales to the acre—heaviest yield ever made in that State. Lint 36 to 40 per cent. Bushel, \$1.00; five bushels, \$4.00.

TRUITT'S BIG BOLL COTTON (Short Staple)—Forty bolls to pound. Mr. Truitt is the only man in Georgia who ever made 100 bales of cotton with two mules. Mr. Truitt received first premium at Piedmont Exposition, 1890; Chattahoochee Valley Exposition, 1890; Augusta Exposition, 1893, 1894. South Carolina Experiment Station tests make Truitt's the best yield. Mr. Truitt lays claim to having the most prolific cotton in the world. This is a distinctive cotton with its big seed, and its big bolls, making gathering easy. Some of the most scientific and best posted farmers in Georgia grow nothing else. Bushel, \$1.00; five bushels, \$4.00.

JONES' IMPROVED COTTON (Short Staple)—In 1870 Mr. Jones, from North Georgia, imported some seeds from Algiers, on the Mediterranean Sea. Plant had no limbs, but immense bolls were attached all over stalk. This was hybridized many years by Mr. J. with our finest Cluster cottons. For six years the United States Agricultural Department distributed this seed, ex-Commissioner Loring going to Jones' Farm to look at it. It is being distributed by U. S. Government this year.

The Georgia Experimental Station Bulletin 27, 1898, gives it the highest record for yield, receiving the Station's highest endorsement. Branches widely. Often-times five locks to boll; 1,250 pounds seed cotton to 500-pound bale. Fruits on limb and stalk. Large seed; strong staple; exceedingly large bolls. One bushel, \$1.25; five bushels, \$5.00.

JACKSON LIMBLESS COTTON—The most exploited cotton in the South. Widely advertised and controlled several years by syndicates. Almost limbless. Can plant thick. Good grower. Claim to make 25 to 50 per cent. more than with other cottons. Very tall and prolific. The length of staple is same as New Orleans upland—between our short and long staple. Brings in our market 1-8c. over short staple. Stood in '98 Georgia Experiment Station at the top of list among thirty-one cottons for

productivity. We have highest grade seed. Bushel, \$1.50; five bushels at \$1.25 bushel.

DRAKE'S CLUSTER (Short Staple)—Distributed by U. S. "free seeds" in 1897 and 1898 and 1899. Gives the farmer early encouragement. Knuckles down to its work at once. Bushy in growth. Develops rapidly, and therefore invariably with favorable season makes the second or top crop. Bushel, \$1.00; five bushels, \$4.50.

TEXAS STORM PROOF (Short Staple)—Name shows character. Does not blow out. Hardest and best poor land variety known. Distributed by U. S. Government in '97 and '98 and 1899 in "free seeds." Fruits from the ground. Stands wet or dry seasons. Bushel, \$1.00; five bushels, \$4.50.

NANCY HANKS: PEERLESS, RUSSELL BIG BOLL—All of these well known short staple cottons at \$1.25 and five bushels for \$5.00.

DOUGHTY'S EXTRA LONG STAPLE—Mr. D. is an intensive fancy farmer near this city, and at the same time has been for twenty-five years one of Augusta's most experienced Cotton Buyers for export. He has been improving this seed (originally from a Southern Experiment Station) for many years. The stalk is long limbed and branching. Yields 400 pounds lint per acre. The staple is one and five-eighths inches long. Three and one-half cents per pound more than middling is now being asked in this market for it. Mr. D. has bought as much Long Staple Cotton as any buyer perhaps in the South. He says it is the best staple he has ever seen—certainly the best that has ever come to Augusta market. Our leading cotton factors agree with Mr. D. Eleven bales of cotton were made this year on twelve acres, and when middling was selling here at six Mr. D. refused nine and one-half for his crop. Price, Bushel, \$1.25; five bushels, \$5.50; ten bushels, \$10.00.

ALLEN'S SILK LONG STAPLE—A long used high grade long staple. The most silky cotton known perhaps. The best known long staple and most used. Same price as Doughty's.

COOK'S SILK LONG STAPLE—We sell a large amount of this long staple also. Exported in '99 a large amount to foreign countries. Same price as Doughty's.

SEA ISLAND COTTON—Forty-two pounds bushel. The famous Sea Island Cottons off the South Carolina, Georgia and Florida coasts are known all over the world. While planted seventy-five miles interior, yet seed must come annually from coast or lint is not so long. Roller gin is used, lint slipping the seed. Our seed are from large growers off South Carolina coast. Product of this cotton is about 400 pounds of lint to acre. Our grower received 35 cents per pound for his 1894 crop. Asked 38 cents per pound for 1895 crop. One bushel (42) pounds, \$1.50; five bushels, \$1.25.

OATS.

APPLER OATS—The finest oat according to Experimental Station, Georgia, in the South. Rust proof. Hardier than Texas. Heavy, 37 pounds to bushel often. Matures about ten days earlier than native rust proof and week or ten days later than Burt. Exceedingly prolific. Can be harvested about last week in May. Georgia Experiment Station say they could have sold 10,000 bushels in '99 at 75c. if they had had them. We are growing a large amount for 1900.

IMPROVED RUST PROOF OATS—These are Augusta's best Native Rust Proof. No other crop about here is so heavy an oat as this of ours. These oats have been selected and improved three or four years. They stand far more cold than the imported Texas oats, and are far heavier. These oats weigh 39 per cent. more than Texas Rust Proof. Our friends must remember that it takes as much chaff for a little as a big grain, and in Texas oats they are buying mostly chaff and beard. We are heavy wholesale dealers in these oats. Get price. State quantity.

TURF OR GRAZING OATS—(32 pounds)—Do not resemble oats till they head. Look more like rye, and look, too, like Orchard grass. No cold whatever seems to kill them. They can be grazed, and afterward will grow off and head out like rye. These oats are popular, and widely used further North. We've sold them for three or four years, and our growers have been greatly pleased with them. Get prices.

BURT OATS—These are practically the only spring oats—far safer and better than other oats sown in spring. And when oats are winter killed these

oats are invaluable. The Burt oat is also a good oat sown in fall. Two or more weeks earlier than Native Rust Proof. Our seed grown here for us from Georgia Experimental Station seed stock. We are large dealers in these oats.

POTATOES.

IRISH POTATOES—Ten bushels per acre. Early Rose, Goodrich, Crown, Jewel, Beauty of Hebron, Triumph. We do not sell less than one barrel. Our trade is only wholesale, and to the merchants of our territory we offer only the choicest seed Potatoes.

We do an immense business to the merchant trade in this territory.

We sell choicest **MAINE POTATOES**, and also Second Crop Southern grown. Our Experimental Stations rather prefer the second crop Southern grown to Maine potatoes.

A good paying crop of potatoes can be had here—sown August 1. Be sure that the eyes are well sprouted when you plant. If they are not the seed sometimes rot before sprouting. To know this universally would be \$10,000 to Georgia.

SECOND CROP IRISH POTATOES—All Southern Experiment Stations have declared these in every way equal, probably superior, to Maine potatoes. Our grower is the largest and most scientific grower we know. Our merchant trade in these yearly is very heavy.

EARLY ROSE; EARLY NORTON—An improved and the earliest Early Rose.

SUMMIT—A late Early Rose.

QUEEN—The earliest of all.

ALBINO (White)—The best of all.

TRIUMPH—A favorite in the country.

CLARK No. 1—An Early Rose, ten days later than Norton.

SWEET POTATOES—Georgia grown Seed trade supplied. No part of America, we believe, grows the sweet potato to the same perfection that County of Richmond does.

VINELESS BUNCH YAMS—Vines do not run. Grow erect. Can be plowed and cultivated like corn. Grows well between corn hills. Potatoes easily gathered. Bunching like Irish potatoes. Sweet; taste like old time Spanish potatoes. The coming potato for use. Bushel, \$1.50.

PUMPKIN YAM—Rather late. Universally grown about here. Georgia Experiment Station says: Oblong, weight 2.41 pound. Color skin, cream pink; flesh, pumpkin red. Quality, rich, sugary. Productive. Improves with keeping. Bushel, \$1.50.

COW PEAS—These seed grown in Georgia. United States seed trade supplied. Sixty pounds to bushel. Their best habitat is about us. The South's best friend. The clover of the South. Contains more nutriment as hay than clover or alfalfa. Grows in poorest soil. Invaluable, whether grown for hay, peas or soil renovator. Georgia Experiment Station made, per acre, 25,256 pounds of green hay, or 5,000 dry. Declares them to be the soil's best renovator. Recommends them for Illinois, Ohio, Indiana and all Middle States. Seed must come from South. Plant about May 10—or after grain—one bushel of (Miller) to one and one-half (Whipporwill) acre, broadcast, and between hills, one-half to one bushel. Get prices. Northern seedmen must not expect a rough seed like these, sold at close figures and low, to be as clean and free from chaff as are garden peas. The pea crop will be very short this year and high prices will obtain.

UNKNOWN, OR WONDERFUL, OR BOSS, OR QUADROON—Georgia Experiment Station declares for the third time above peas to be identical, and declares this pea the best combination pea for heavy vines and stock pea. Stands at the head. Fancy prices asked in many quarters. Erect vines. Late maturing. Pale buff color peas.

WHIPPORWILL OR SPECKLED—Georgia Experiment Station acre yield, 16,892 pounds vines and 25 3-10 bushels peas; old variety; tall, upright; yellow pod; brown speckled pea. The earliest of all peas. Not much vine to it. Grown principally for the peas, of which it bears heavily. We ship many of these peas North.

BLACK-EYE WHITES; YELLOW-EYE WHITES. Quotations given and trade supplied with **IRON, CLAY, MILLER, TORY, BLACK, LITTLE LADY, CROWDER.**

MIXED COW PEAS—Not one Georgia farmer in one hundred grows straight unmixed peas of one type. He grows mixed peas because it is better, and for this reason—if the soil or season is not favorable to one type, then it will be favorable to some of the other types. 'Tis almost impossible for this reason to buy straight unmixed peas. We say this to United States seedmen, viz: If you want the best out turn in peas (hay and peas) then order high grade mixed peas. They are cheaper, too.

UPLAND PEARL, OR CAROLINA RICE—(Georgia grown seed. Trade supplied)—Forty-four pounds to bushel; drill in April or March. One peck to acre, covering one and a half inches, or drop twelve seed in hill twelve inches apart; rows three feet apart; plant in stiff land; damp is best; profitable crop; largely grown around Augusta; best prices from us in large amounts; yield twenty to thirty bushels in upland and thirty to sixty bushels in lowland. Bushel, \$1 75.

JAPAN RICE—(Georgia grown). United States seed trade supplied. Unlike Pearl Japan makes continuous growth and fruitage through season and is then a sure cropper. Same price as Upland.

NATIVE (Augusta, Ga.) RYE—(Seed trade supplied)—We have had for years a heavy merchant trade, even into other States, for this rye. We shall grow this year a very large crop of the highest type. This rye stools heavily. Can be grazed several times, and then allowed to go to seed. If cut and fed green, it has made ten tons green food in five months per acre. Rye grown in Tennessee, Virginia, Middle or Western States is cheaper. But it runs on the ground, and is slow growing, and is no good here. It is a different type of rye. Plant in September or October three-quarter bushel to one bushel per acre. Bushel, \$1.50.

PURPLE STRAW AMBER WHEAT—(Sixty pounds)—After experimenting with twenty varieties of wheats, we find for Georgia this is the best. This wheat is free from cockle and cheat. This wheat by expensive machinery is smutted. Bluestone is not necessary; and by no means must this wheat be soaked in bluestone.

We sell tremendous amounts of wheat, and our stock can be relied on for this section. Get prices.

HOG CROPS.

Hog growing is an absolute necessity to Southern farmers. They can compete with other portions of our country by growing the following. Just about us these crops attain their highest development. Can supply largest quantity.

JERUSALEM ARTICHOKE—Georgia grown. Widely advertised as a hog crop. Even in five feet rows, roots run from row to row and make tubers—the underground being a network of artichokes. Tubers will stay in ground all winter and not freeze. Turn in hogs at

any time. If not eaten too close crop will come up in spring without second planting. Used also for pickles. Cut tubers like Irish potatoes, and plant after frost—one piece every three feet, in four or five feet rows. Three bushels, one acre. Bushel, \$.50.

CHUFAS—Georgia grown seed U. S. seed trade supplied. Forty-four pounds one bushel. Soak seeds one week. Plant one peck to acre. Plant twelve inches apart in rows two and a half feet apart. Give two plowings and hoeings. If you get a bad stand pull out shoots from growing plants and plant and use these. Indeed, many growers bed like sweet potatoes and transplant the slips. Chufas grow just under the surface, like all grass nuts. Invaluable for fattening hogs. Turn hogs in patch. Mature in September and lie in ground till eaten. It is the easiest thing to grow, and makes more hog food to the acre, even on poor sandy soil, than anything we know. Easily grows over 100 bushels to acre—which does not even have to be gathered. Very prolific, sweet and nutritious. We have tested their growth about Chicago. It thrives and matures well. Peck, \$1.00; bushel, \$3.50.

SPANISH PEANUTS—Georgia grown seed. United States seed trade supplied. Grows to perfection about us. A great advance in peanuts, and much written about as a hog crop. Two hundred bushels per acre. Plant about one bushel No. 24 to acre, March to July. Follow after oats, or plant two crops, March and July, on same ground; no pops. Plant close in sandy lime lands. The tops are good forage. Peas easily harvested, as all peas hang to roots as plant is pulled up. Hogs can be turned in, or the whole vine can be fed from the storage barn. A high Georgia farming authority says that we could revolutionize our agriculture if in the corn row between the stalks we would plant a hill of cow peas, and in the middle furrow a row of Spanish peanuts. Bushel, \$1.50; five bushels, at \$1.25. Used also for parching.

We sell also the **BIG PEANUT**—State quantity when prices are asked.

AFRICAN GOOBER—Georgia grown. United States seed trade supplied. Come in pods like Peanuts, except pods are single. Taste like field pea, but are much larger in size. Will not sprout in ground. Can remain all winter in ground for hogs. Yield as great as Chufas, and the gathering is much easier. The yield is very heavy. Bushel, \$2.50.

GRASSES FOR THE SOUTH

Grass seeds fluctuate a great deal in price. Write for prices in large amounts. State quantity if you want a number of acres to plant.

RED CLOVER—(*Trifolium Pratense*)—Sixty pounds to bushel. Sow broadcast in September or October, twenty pounds to the acre, or sow with any spring grain as early as ground is suitable for plowing. Needs a stiff soil. The most widely cultivated of all pasturage plants for pasturage, hay and enricher of soil. Price, one pound, 15 cents; five pounds, for one-quarter acre, 70 cents. Get bushel prices.

SCARLET OR CRIMSON CLOVER—(*Trifolium Incarnatum*)—Sixty pounds to bushel. An annual. Withstands both our heat and cold. A month earlier than red clover, and can be sown on thinner lands, and any lands but wet. Can be cut for green food in April or May, or for hay, or for plowing under. Stems in bloom vary from two to five feet in height, and stools heavily, one seed making oftentimes one hundred blooms. It grows during fall and spring months. Sow from September to December, twenty pounds to acre. Broadcast. Can be pastured in December and January, and still yield. Is sown about here usually with oats. Do not plow under. Sow on top of ground, and lightly harrow it in. One pound, 10 cents; five pounds, for one-quarter acre, 45 cents.

WHITE CLOVER—(*Trifolium Repens*)—Not a heavy hay producer, but invaluable in permanent pastures. Sow twelve pounds to acre in fall or spring. Fall is better. Price, 35 cents a pound; three pounds, for one-quarter acre, \$1.00.

LUCERNE CLOVER OR ALFALFA—(*Medicago Sativa*)—Sixty pounds to bushel. No grass fields in United States are more noted than Lucerne farms of California or Louisiana, where its roots grow to a great depth, with four or five cuttings yearly; eight tons hay per acre. Stools or multiplies its stems heavily, thirty or forty stalks from one

root. These throw out numberless intertwined branches, average growth three feet. Drill or broadcast fifteen pounds per acre. Spring or fall (February or March best). Cut before blooming four to six times a season. Stand once set lasts a lifetime. Don't graze it. Rich, sandy soils best. One pound, 15 cents; four pounds, for one-quarter acre, 60 cents.

BERMUDA GRASS SEED—(*Cynodon Dactylon*). U. S. seed trade supplied. We offer reliable and very cheap Bermuda seed. Three to five pounds mixed well with fine sand should set an acre. Is to South what Blue Grass is to Kentucky. The best hay grass for all rich soils, wet or dry. Makes two annual cuttings, two to four tons per acre. Once established makes permanent pasture. Plant seed any time but late in fall or winter. One pound, \$1.00; 5 pounds, 90 cents pound.

BERMUDA GRASS SETS—Five pounds to bushel. Plant twenty-five to fifty bushels per acre. Set out sets any time but winter, about one foot each way in smooth soil; cover lightly. Twelve bushels for \$1.50.

KENTUCKY BLUE GRASS—(*Poa pratensis*)—Fourteen lbs. to bushel. Pasture grass, well known; sow in fall; usually sown with other grasses—Orchard grass, clovers, etc. Also used in lawns and woodlawn. Sow two bushels per acre. A perennial for dark soiled lowlands or lime lands. Good grazing in fall and winter. Gets better each year. One pound, 20 cents; one bushel, one-half acre, \$2.00.

JOHNSON GRASS—(*Sorghum Halepense*)—Twenty-four pounds to bushel. Known also as Guinea and Means grass. Vetch and Johnson Grass are the standard Augusta Hay Farm mixtures. Plant Johnson Grass as soon as the frost is out of the ground, or August and September, forty pounds to the acre. Cut before the head is in flower. Three to five cuttings per season; withstands any drouth; yields heavy crops, year after year, without rest-

ing. Hogs devour the roots as if they were sweet potatoes. Is almost ineradicable. Do not let it go to seed; it spreads if you do. Coarse but fairly tender when cut young. Makes immense crops; very hardy. Augusta is a large grower of this grass. We supply wholesale trade. One pound, 15 cents, at Augusta; ten pounds, for one-quarter acre, \$1.25.

HERD'S OR RED TOP—(*Agrostis Alba*)—Ten pounds to bushel. A good perennial, generally sown on permanent pastures, generally on moist lands. It is best when fed close down as a forage plant. Not killed by overflows. Improves with age each year. Chief value is when made part of grass mixtures for fall pasture. Sow in fall or spring, two bushels to acre. One pound, 15 cents; ten pounds, half acre, \$1.25.

GERMAN MILLET—See under "Forage."

ORCHARD GRASS—(*Dactylis Glomerata*)—Fourteen pounds to bushel. Sow two bushels to acre, fall or spring. An excellent perennial. Commence spring growth in February, ready for hay cutting in April. Graze then till hot summer. Early autumn starts new set of leaves, making rich pasturage, remaining green all fall and winter. Mixes well with Red Top. A good woodland pasture. No better winter growth on wet or heavy clay lands. One pound, 20 cents; bushel, for half acre, \$2.25.

NATIVE VETCH—(*Vicia Sativa*)—Fifty pounds to bushel. This is the standard hay grass used in the widely known hay farms around Augusta. Some allow first crop to get about half ripe. Enough seed fall to the ground for reseeding purposes to come up next February. The second and other crops cut in a greener state. Grows well with oats, to be cut into sheaves. Grows well with Bermuda and Johnson Grass. Vetch is unexcelled for winter pasturage. One bushel to the acre will set a crop. Plant two or three bushels for fall pasturage. Sow in August and September with oats or sow in spring. One pound, 15 cents; bushel, finest native, \$5.00; fifteen pounds for one-quarter acre, \$1.50. These native seed are far superior to imported Vetch seed.

HAIRY VETCH—(*Vicia Villosa*)—The United States Agricultural Department says: "This is the most valuable winter forage plant which the Department has

imported for rich soil." Ex-Congressman Geo. D. Tillman, of South Carolina, says: "The best of all the hundreds of grasses tested by me. I plant in fall, pasture from November to April 1st—by June it reseeds itself; then plow under; sow peas and cut peas. Vetch is up by December. As a hay crop two or three cuttings can be had." Sow one bushel, sixty pounds, to acre, in spring, August or September or October. Spring sowing soon makes dense crop. Vines five to ten feet long sometimes, and foliage two or three feet deep. Can be made to reseed itself like ordinary vetch, above. Five pounds to acre, sown with oats for hay. Makes finest outturn we ever saw. One pound, 15 cents; one-quarter acre, fifteen pounds, for \$1.25.

LAWN AND PARK EVERGREEN GRASS—We have the best mixture we know of. It is made for use in New York City, formula of Central Park grass. So compounded with seven or eight grasses that it ensures green grass all the year. Our mixture has succeeded here when others failed. Fourteen pounds to bushel. One pound of seed, 35 cents; plants plat 20x30 feet.

GIANT BEGGAR WEED—(*Desmodium Molle*)—Southern seed. United States seed trade supplied.—Sixty lbs. to bushel. Drill or broadcast five to ten pounds an acre in sandy lands after frost. Can be cut several times. Can be pastured late summer and fall. Equals cow peas as a soil renovator. Three to six feet in length. Deep roots. Can be sown in cornfield. Interferes with no crop; easily kept under by cultivation. Eradicated by grazing two successive seasons.

What the Commissioner of Agriculture of Florida says of this valuable plant:

"Beggar Weed has been to Florida what clover has been to Tennessee and Kentucky, and Peas to Georgia and Alabama. But it is superior to either, in that it will thrive on much poorer land than either of the above, and it never requires reseeding, and certainly is more fattening to stock of all sorts than any forage plant known; besides, it improves and enriches the land each year on which it grows, and this without the expense of turning it under with the plow."

Small seed; cover only one inch deep. Pound, 45 cents; three pounds, one-quarter to one-half acre, \$1.00.

JAPAN CLOVER—*Lespedeza Striata*—(Southern seeds. United States seed trade supplied.)—Twenty-five lbs to bushel. Sow ten pounds per acre. Grows anywhere, and is tenacious in any soil, and lasts always. It is well known now in South. Scatter a few pounds seed in fall or spring in permanent pastures. Soon covers the ground, and is eaten greedily by stock till frost. In some soils it grows twenty inches high; is mowed; two tons to acre. Growth starts in early spring. Ready for grazing from June to frost. Pound, 30 cents; two and a half pounds, one-quarter acre, 70 cents.

PASPALUM PLATYCAULE, or Carpet Grass.—U. S. trade supplied. Grows tenaciously in any sandy soil. Green all the year. Spreads like Bermuda; takes joint every few inches. The

blades are wide, giving fine foliage. Grows five or six inches. Best of all grazing grasses. One parent stalk in fifteen months would spread several feet in circumference. Two quarts of seed mixed with sand for sowing should set an acre. Plant in spring or early fall. Cattle cannot uproot it. A highly interesting and valuable plant for pasturage. Pint, 60 cents. Seed small.

BUR CLOVER—Ten pounds to bushel. Plant two bushels to acre in fall. Sow burs loose on ground. Stands a lifetime and through coldest weather. To destroy, plow late in fall or early spring. Graze till May 1, then take off cattle and it will reseed. Grows three to four feet. Coarser than red clover. Planted with Bermuda it makes all the year pasturage, though clover must be allowed to go to seed.

Brown's Watermelon Wilt Remedy.

4-pound package, \$1.00, postpaid; one pound package, \$3.00, postpaid.

REMARKS—Tens and tens of thousands of melon lands in the South, on account of vine wilt, are now discarded. Growers have now to leave home and rent new lands. No discovery ever made means so much to melon growers as does this.

Brown's Watermelon Wilt Remedy

Is offered for the first time now as a preventative. We do not absolutely guarantee it, for it has only, as yet, one year's trial. For 1899 it was a sure preventive and specific. Mr. P. Brown, the inventor, is possibly the most expert and successful melon grower in the South. This formula is the result of the most painstaking, scientific research and study. His success with it in 1899 astonished and thrilled the melon growers and railroad carriers of southeast South Carolina. His faith is shown in the fact that he puts down in melons this year 200 acres of discarded land; worthless because subject to wilt. Aside from its ANTI-WILT PROPERTIES it is also a crop stimulant, and the grower gets his total cost back in the increased longevity and productiveness of his vines.

DIRECTIONS—For one to twenty-five acres of land, requiring one to twenty-five pounds of seed, use ¼-pound package of Wilt Remedy. One pound package of the Remedy will inoculate fifty to one hundred and fifty pounds of seed, for fifty or one hundred and fifty acres. Put ¼-pound package of the Remedy in eight gallons of water with seed, and let all remain twenty-four hours. Take seed out, drain and dry them and then plant. For one pound package of the Remedy use in similar manner twenty-five gallons of water.

OTHER DIRECTIONS—When putting down your fertilizer put in a handful of *air slaked lime* to each check of the land, and throw the two furrows together and plant. One light barrel of the lime may be required to each acre. We can supply the lime at \$1.00 per barrel, or you can buy it near you. The lime, you will see, is the only real element of cost; but it is a very necessary part of the preventive.

Boracine!!

**The Baby's Powder
And for Prickly Heat.**

A well cared for baby is washed half-a-dozen times a day. (Is this why they call 'em "wet" nurses?) Every time it is washed it must be powdered! BORACINE is the finest Baby Powder in the world. Its the sweetest in perfume extracts. Its a skin tonic and takes off pimples and spls tches. Its cooling and takes off redness of skin. Besides this, it is for babies and grown ups, the only SPECIFIC FOR PRICKLY HEAT known.

CHENEY'S EXPECTORANT

THE GREAT CROUP REMEDY

FOR YOUNG AND OLD.

AFTER LONG EXPERIENCE.

For the past ten years I have been using Cheney's Expectorant and have found it the quickest and best remedy I have ever used for coughs and colds of any kind, and believe it will stop any case of croup if taken in time. I always try to keep a bottle in the house for my children. They take it without trouble.

Very respectfully,

J. D. CARTER, Atlanta, Ga.

 **Retailed by Dealers and Druggists Everywhere.**

TAYLOR CHEROKEE REMEDY

INFLUENZA,
LaGRIPPE and
CONSUMPTION.

CURES CONSUMPTION.

CHARLES HARRIS Little Rock, Ark.: "I have been using your Sweet Gum and Mullein for about six months and it cured me of consumption."

W. W. DRAPER, a prominent wholesale shoe merchant of Atlanta: "I take special pleasure in commending your preparation, Sweet Gum and Mullein, as one of the best I ever used in cases of colds, coughs, bronchial and lung troubles. I have used it for years in my family and have always derived immediate benefit from it. It is one of the best medicines on the market for what you recommend it."

Pyny-Pectoral

A Sure Remedy for
**COUGHS
COLDS
CROUP**

Dec. 1st, 1898.
J. BEVERLY HARRISON,
109 Sycamore St.,
Petersburg, Va.,

Says: "There is nothing equal to Pyny-Pectoral for Coughs and Colds. I have used it for Croup and Hoarseness with my children and it has acted admirably.

Big Bottles, 25c.

DAVIS & LAWRENCE CO., Ltd.,
Prop's Perry Davis' Pain-Killer.

"Pitts' Carminative

Saved My Baby's Life."

JOHNSTON STATION, GA., September 16, 1898.
LAMAR & RANKIN DRUG CO., Atlanta, Georgia.

GENTLEMEN:—I cannot recommend your Pitts' Carminative too strongly, as I owe my baby's life to it. She had Cholera Infantum when five months old and I could get no relief until I began using Pitts' Carminative. The fever left her when I had given her but two bottles and she had fattened so she did not look like the same child. I advise all mothers who have sickly or delicate children to give this remedy a trial. Respectfully, MRS. LIZZY MURRAY.

It Saved Her Baby—
Will Save Yours.

Dodge's Indelible Slate...

25 Cents, Postpaid.

More than 100,000 of these little patent slates, used for the easy and plain marking of clothing with Indelible Ink, have been sold in the South. We have now secured Southern control and will be sole manufacturers. To mark clothing is difficult and generally bad work. We are apt to make so

many big blots; and the rough cloth gives us no freedom of pen. Always, its a bad job. With this Slate you can do as good, easy and correct work as you could do with a fine pen on note paper. In one box, which we will mail you (postpaid) for 25 cents, comes complete the who's outfit—Slate, Stylus, Indelible Ink, etc. Nothing ever invented along this line compares with this simple patent, which we now control. **To Women Who Want to Make Pin Money—or Other Money** this is the easiest way. Simply canvass your town or city and show how easy marking clothing has become. Thousands and thousands have thus been sold by women. Price to canvassers will be (cash with order) 1 dozen free at your express office, \$1.50; 12 dozen free at your express office, \$15. Or we will send you 12 dozen at \$15 free at your express office if you will get a merchant of standing in your town to guarantee the account (\$15.00) to be charged to you. Address,

SOLD AS HIGH AS \$4 A BOTTLE

TIFTON, GA., July 5th, 1899.

MR. A. B. GIRARDEAU Savannah, Ga.

Dear Sir—I was in Cuba from August 17, 1898, to March 27, 1899. About September 23 I had an attack of fever, and used Johnson's Chill and Fever Tonic, and in two days was on duty. I had better health than any officer of my regiment. I attribute this to the use of Johnson's Tonic. I have used no other medicine for the past 18 months, and I consider it the best fever medicine that can be obtained. Yours truly,

JOHN A. SIBLEY.

(Formerly Captain Ray's Immunes.)

Many of our soldier's took a supply of the Tonic with them to Cuba. Those who had not supplied themselves paid as much as \$3.00 a bottle for it, after seeing what wonderful cures it made. While the retail price of the Tonic is only Fifty cents a bottle, still it is cheap at \$4.00. It cures fever in a single day. Nothing else cures like it. You can buy it for only 50 cents a bottle. The best general tonic and appetizer on earth. It costs 50 cents if it cures, not one cent if it does not. For sale and guaranteed by N. L. Willet Drug Company, Augusta, Ga.

SOWING AND REAPING.

To obtain the best results and avoid failures, it is necessary to sow that which has always proved successful in the past. If a farmer wishes to raise cotton, he would not plant rotten seed; or, if he were troubled with Biliousness, Constipation, Dyspepsia, Malaria or any disorders arising from a torpid liver, and sent for a package of **Simmons Liver Regulator**, he would reap no benefit if he accepted a worthless substitute for that well known remedy. Don't be fooled by dealers who offer something else, when you ask for **Simmons Liver Regulator**. **Simmons Liver Regulator** is not made by any one named **Simmons**. No one else makes or can claim to make it but **J. H. Zeilin & Co.** Beware of imitations bearing part of the name of **Simmons Liver Regulator**, or resembling it in shape, size or style of package, as some parties use these deceptive means to try to associate themselves with **Simmons Liver Regulator**, even mentioning the name of **J. H. Zeilin & Co.** in advertisements, thus attempting to deceive the public by classing their imitations with **Simmons Liver Regulator**. We therefore warn you to always ask for **Simmons Liver Regulator** and be sure that those identical words are on the package, for if the word **REGULATOR** is not on the package, it is not **Simmons Liver Regulator**.

TAKE

SIMMONS LIVER REGULATOR

For Biliousness, Constipation, Malaria, Chills and Fever, Sick Headache, Dyspepsia and all diseases arising from a disordered liver. **Simmons Liver Regulator** is purely vegetable, mild and effective in its action, and easy to take. It acts without pain or griping, causing perfect digestion and healthy regularity.

In the form of a lemon syrup, easy and pleasant to take.
Tasteless and Guaranteed. 50 cents.

RAMON'S PEPSIN CHILL TONIC and RAMON'S TONIC LIVER PILLS form a treatment that never fails even in the most obstinate cases of malarial poison.

RAMON'S LIVER PILLS AND TONIC PELLETS

A Tasteless and Guaranteed Cure for Chills and Fever.

It wipes out of existence completely the little parasites of bacilli in the blood. When they are gone of course the disease is gone. It does this, too, without impairing the stomach, nervous system or hearing of the patient.

It is made of cinchona bark, just as sulphate of quinine is, but the elements which make quinine harmful and dangerous are carefully excluded.

It is a Tonic as well as a Chill Cure, containing **Pure Iron**, which purifies and builds up the blood, and **Pepsin**, which is the greatest aid to digestion known to medical science.

The guaranteed fact that **Ramon's Pepsin's Chill Tonic** cures 999 out of a 1000 makes it one of the greatest sellers ever offered to the trade.

Every bottle of **Ramon's Pepsin Chill Tonic** has with it three of **Ramon's Tonic Liver Pills** which thoroughly arouse the liver and put it on guard against the further admission of the deadly enemy.

Mr. T. S. Morris, Bellefontaine, Miss., writes: "Ramon's Pepsin Chill Tonic is a dead shot every time. I guarantee every bottle. It has not failed in any case. It has cured several chronic cases that had defied the best physicians. Ramon's Pills and Pepsin Chill Tonic combined will cure any case of malaria on record."

PRICE 50 CENTS.

Brown Manufacturing Company,

GREENEVILLE, TENNESSEE.

RAMON'S PEPSIN CHILL TONIC leaves no resulting deranged stomach, no deafness, no shattered nervous system, no impaired digestive organs, no quinine taste.

Contains Pure Soluble Pepsin, Pure, Rich Iron, the essential elements of Cinchona Bark.

A DEAD LOSS

That's a Horse or Mule who dies of Colic. Dead loss \$125. Can you afford it? If not, we say honestly you will never lose an animal in your life by Horse Colic if you but us

HOLLEYMAN'S COMPOUND ELIXIR

50

CENTS here or laid down at your nearest Southern Express Company's Office, free of express to you.

FOR HORSE COLIC.

It will Cure any Case of Horse Colic under the Sun.

Don't wait until Your Horse Dies before you buy a bottle.

CAPT. JAS. M. SMITH, of Smithsonia, the largest farmer in Georgia, writes us: "I consider Holleyman's Elixir a splendid medicine for Horses and Mules—the best I have ever tried. Every owner of a horse or mule might save money by constantly keeping on hand this Elixir."

DR. B. B. KITCHEN, Mitchell, G., says: "I have used Holleyman's Elixir in Horse Colic. I recommend it as a Specific."

S. S. SANDERS & Co., Egypt, Ga., says: "Have sold it and used it, it is all it's claimed to be. Its effect is magical."

W. H. JONES, Stellaville, Ga., says: "I have been using Holleyman's Elixir one year, and saved several horses' lives. It never fails in Horse Colic."

Capt. R. H. WALKER, Appleton, S. C., says: "*Worth its Weight in Gold* to every farmer. I saved three horses' lives on my plantation in sixty days."

O. B. BROWN, Stellaville, Ga., says: "Cured a nice mare that was dying with Colic. The best thing of the kind I ever saw."

S. A. GRAY & Co., Waynesboro, Ga., says: "Have used Holleyman's Elixir for eight or nine years. As a preparation for Colic in Horses and Mules we believe it to be unequalled."

R. H. WOOD, Veterinary Surgeon, Johnston, S. C., says: "I used it in several severe cases. One animal had been given up to die; a part of a bottle saved the animal's life. No horse owner should be without it."

J. F. A. TUFTS, Drummer, says: "In one of my drumming trips of thirty days, I cure three dangerous cases of Colic in horses from my small sample vial holding only one ounce."

W. H. McNORRIL, M. D., Waynesboro, Ga., says: "Holleyman's Elixir is extensively used in this county for many years. I have found it to be an infallible remedy."

W. H. F. RAST & BRO., Swansea, S. C., says: "Holleyman's Compound Elixir is the best medicine of its kind and has given better satisfaction than anything we have ever sold."

**We have crowds of testimony from
Doctors, Veterinary Surgeons,
Merchants and Farmers.**

BORACINE.

THE BABY'S POWDER AND FOR PRICKLY HEAT.

PERFUMED!

There is not a single Baby's or Toilet Powder sold in the market that has such costly and exquisite perfume extracts in them as has Boracine.

THE BABY!

Every baby that comes in the world must be washed and powdered several times a day. Boracine was made for babies. It cures redness and irritation. It cures the baby's prickly heat. It keeps down bumps and pimples, makes baby's skin white, and smooth like velvet. It makes baby as sweet as carnations or white roses.

YOUR BABY NEEDS BORACINE.

Not a Perfect Baby or a Happy Baby Without it.

**PRICKLY
HEAT.**

Big grown-ups, youths, little tots—all have prickly heat. Search the world and you would not find so perfect a remedy as is Boracine. Exquisitely soothing and helpful. Use it freely. Harmless.

Glycerine, Alcohol, Aromatic Elixir, Q. S.

Medicinally used in Syphilis, Scrofula, Cancerous Tumors, Indolent Ulcers, Necrosis, Abscesses, Eczema, Rheumatism, Neuralgia, Catarrh and such like blood diseases. Most helpful also in Pulmonary degeneration. It has been found that it has a most powerful effect in building up and strengthening those systems that have those so common and well known low anæmic conditions of the blood—following after Grippe. Can be used efficiently in all cases of Indigestion caused by irritation of the mucous membranes. Builds up the glandular system. Most delicate stomach tolerates it.

STUART'S GIN AND BUCHU CURES BLADDER TROUBLES

I have been a great sufferer from catarrh of the bladder. I was advised by a physician to try Stuart's Gin and Buchu, which I did with happiest results. I have not been troubled since using this remedy. I think it one of the very best medicines for kidney and bladder.—J. J. McCANTS, Representative from Taylor County, Georgia.

I was nearly dead with kidney affection for six months, growing worse all the time. My case was hopeless—was able to get about but little. I had tried everything with little benefit. I took three bottles of Stuart's Gin and Buchu, and was perfectly cured. Am now well and all right. I owe my life to Stuart's Gin and Buchu.—H. T. MACON, Warrenton, N. C.

For twenty years I suffered excruciatingly with kidney trouble, diabetes etc., having tried many doctors and all the patent medicines I could find, with no effect. Having taken several bottles of Stuart's Gin and Buchu, I am to-day a well man, the first time in twenty years. It is, in my judgment, the best kidney, bladder and urinary remedy ever put on the market.—SEABORN FEW, Madison, Ga.

For all Liver and Stomach Troubles, use Stuart's Gin and Buchu.
FOR SALE BY ALL DRUGGISTS.

Pond's Extract

is not a "cure all." It has enjoyed the confidence of the public for fifty-four years because we have never claimed for it that which it cannot do.

IT WILL CURE INFLAMMATORY DISEASES.

IT WILL HEAL WOUNDS OR BURNS.

IT WILL STOP PAIN AND BLEEDING.

It is invaluable for colds, catarrh, sprains, rheumatism, neuralgia, piles, and all hemorrhages.

USED INTERNALLY AND EXTERNALLY.

CAUTION! Witch Hazel IS NOT Pond's Extract. Ordinary Witch Hazel is sold in bulk, diluted and sometimes contains "wood alcohol" which, taken internally, is a deadly poison.

Pond's Extract is sold only in bottles, sealed at our factory and is guaranteed strong and pure.

Pond's Extract Veterinary Remedy

is used for animals. It has never been equalled for inflammations, wounds, bruises, strains, chafing of collar, saddle or harness, and a general lotion for animals.

POND'S EXTRACT CO., 76 Fifth Ave., New York.

CHRONOLOGICAL ERAS, CYCLES, ETC.

The year 1900 comprises the latter part of the 124th and the beginning of the 125th year of American Independence, and corresponds to—

The year 6613 of the Julian Period; the year 5660-5661 of the Jewish Era (the year 5661 begins at sunset on September 23, 1900); the year 2653 since the foundation of Rome according to Varro; the year 2560 of the Japanese Era, and to the 33d year of the Period entitled "Meiji." The year 1318 of the Mohammedan Era, or the Era of the Hegira, begins on May 1, 1900. The first day of January, 1900, is the 2,415,021st day since the commencement of the Julian Period.

ASPECTS OF THE PLANETS.

Mercury may be seen best on the mornings of April 21st, August 19th, and December 7th; and on the evenings of March 8th, July 4th, and October 29th.

Venus will be brightest on June 1st and August 14th. She will be evening star until July 8th; then morning star the rest of the year.

Mars will be evening star till January 16th; then morning star the rest of the year.

Jupiter will be in opposition to the Sun and brightest on May 27th, and in conjunction with him on December 14th.

Saturn will be in opposition to the Sun and brightest on June 23d, and in conjunction with the Sun on December 29th.

Uranus will be in opposition to the Sun on June 1st, and in conjunction with him on December 5th.

Neptune will be in conjunction with the Sun on June 18th, and in opposition to him on December 19th.

ECLIPSES.

In the year 1900 there will be three eclipses—two of the Sun and one of the Moon:

I. A total eclipse of the Sun May 28th. This eclipse is generally visible in Western Europe, in Northern Africa, the North Atlantic and Arctic Oceans, Greenland, North America, and the extreme northern part of South America. The path of total eclipse begins in Egypt, and, passing over the Mediterranean Sea, crosses Spain and Portugal; thence across the Atlantic, it enters North America at Norfolk, Va., and bearing to the southwest, reaches the Gulf coast near New Orleans; continuing its course across the Gulf of Mexico and Mexico, it encounters the Pacific Ocean at a point near Cape Corrientes; visible elsewhere in regions mentioned as a partial eclipse. Begins in local mean time as follows: At Boston, 8:12 A. M.; New York, 7:51 A. M.; Philadelphia, 7:46 A. M.; Washington, 7:37 A. M.; Charleston, 7:24 A. M.; New Orleans, 6:23 A. M.; Galveston, 6:02 A. M.; Pittsburg, 7:26 A. M.; Cincinnati, 7:06 A. M.; Chicago, 6:55 A. M.; Denver, 5:44 A. M. This eclipse begins here in mean local time at 6:58 A. M., and ends at 9:35 A. M.

II. A partial eclipse of the Moon, June 12th; visible here, but quite small and unimportant.

III. An annular eclipse of the Sun November 21st; not visible here. Visible to Sumatra, Borneo, and some other East India Islands, Australia, Southern Africa, and portions of the South Atlantic and Indian Oceans.

No Man

can supply you with more satisfactory building materials than we can.
That's certain.

No man can quote you better figures, quality and quantity considered.
That's equally sure.

No man that we know of sells on our terms:—"money back if everything is not absolutely up to the specifications."

That's the basis on which we want your orders.

We must be pretty sure of our ground to make an open proposition like that, and it's open to everybody.

Everything we sell you is dependable. It is honest stuff that will give you a solid job and us a more solid reputation.

We make thousands of different articles in the line of rough and dressed lumber, laths, shingles, doors, sash, blinds, mouldings, mantels, pulpits, pews, and all kinds of ornamental woodwork, in every imaginable design and shape. We make many articles in two or more qualities to suit the purses and preferences of builders and buyers. We sell hardware and all kinds of plain and fancy glass, also lime and plastering hair.

We are prepared to supply everything in our line in the whole range of building necessities, from the construction of a palatial residence to the repair of a back fence.

We don't believe in using the best material for common work, nor common material for high class building. You wouldn't go out for an afternoon drive in a coal cart, nor haul coal in your pleasure carriage.

Put the right thing in the right place.

If you need our goods for a certain purpose and feel that the amount of money you want to spend is distinctly limited, tell us what you want and what you want to pay for it. Then let us figure carefully for you and see if we can't fill the bill.

When you are very particular about something and want the very best that can be had, rather irrespective of price, we can do that sort of work—and we shan't let it cost you too much, either.

There is every reason why we should have your orders. Here you get what you want—the right goods, the right prices, the right service, and the guarantee which insures you satisfaction.

You couldn't ask more. We wouldn't give less.

Ask us for our catalogue—mailed free. It contains ninety-one pages of information about doors, sash, mouldings, etc., with pictures and designs. The last four pages tell exclusive things about building that you ought to know—things to save you time and money.

You owe it to yourself to get our prices.

Send a list of what you want so we can quote you.

DR. GILDER'S LIVER PILLS

are so constructed that
they do FOUR things:

They Act on the Liver.

They Act on the Upper Bowels.

They Act on the Lower Bowels.

They Act upon the Kidneys.

NOTE—Other pills do only a part of above.
They do not gripe.

No Southern made pill is so popular as Gilder's.

It was born in the South Thirty years ago.

It was raised in the South.

It has always been made in the South.

It has cured more Southern Liver troubles
than any other pill.

Southerners should use them.

Let Northern pills cure Northern people.

For the Cure of Liver Complaint, Biliousness, Heartburn, Dyspepsia, Indigestion, Pains in Back, Side, Etc.

Directions for Using.—If your Liver is not acting properly, and you feel dull and drowsy and headachy, three pills at night will clear the system of vitiated bile, and make you feel like a new person.

If you have a pain in the side or back, it probably arises from a torpid Liver. Stir it to action by taking a dose of these LIVER PILLS.

If your Bowels are constipated, two pills at bed time will set you all right.

If your food does not digest, take two of three pills twice a week at bed time, until three or four doses have been taken, and you will feel yourself entirely relieved of these disagreeable symptoms.

If your complexion is sallow and your eyes discolored, a full dose of these pills will impart a roseate hue to your cheeks, and give your eyes the brilliancy of perfect health.
